

# Preseason Checklist

To make sure you are ready to capture all possible sales, we need to have you **STOP** and take 5 minutes to reply to this vitally important request. All A/C recovery machines have a federally mandated SHUT-DOWN FUNCTION.

## If your machine looks like this

- Plug in and turn on the machine. Using the touch pad to the left of the screen, scroll down to #8.
- Select "Enter", then arrow key right, one time, and read "filter life remaining".
- If it is less than 50 pounds, your machine will need a filter change SOON. The closer to zero, the sooner it will lock you out.
- The YELLOW JACKET Replacement Filter part number is 38003.
- If you do not have a replacement filter, contact facilities maintenance to order OR to arrange service.
- Help is available for filter change procedures by calling YELLOW JACKET tech support at 800-769-8370.

## IF YOUR MACHINE FACE LOOKS LIKE THIS

- Plug in and turn on the machine. Press the reset key until screen reads "Select Mode."
- Press the down arrow key once to determine the filter life remaining.
- If it is less than 50 pounds, your machine will need a filter change SOON. The closer to zero, the sooner it will lock you out.
- The YELLOW JACKET Replacement Filter part number is 38003.
- If you do not have a replacement filter, contact facilities maintenance to order OR to arrange service.
- Help is available for filter change procedures by calling YELLOW JACKET tech support at 800-769-8370.

Both types of machines require a MINIMUM of 10 pounds inventory to accurately function
